

# **LOSS PREVENTION AND SAFETY PROMOTION IN THE PROCESS INDUSTRIES**

## **PREPRINTS**

**2nd International Symposium  
Heidelberg, 6-9 September 1977**

## C o n t e n t s

=====

Session I - Software

T.A. Kletz, Middlesbrough, GB		
What are the causes of change and innovation in safety?	I	1
T.J. Webster, London, GB		
When safety is dangerous	I	15
F.P. Lees, Loughborough, GB		
Developments in the control of major hazard installations in the UK	I	25
G. Schoen, Braunschweig, FRG		
Basic aspects for setting up safety recommendations to prevent explosion hazards	I	35

Session II - Software

F.M. Meppelder, Voorburg, NL		
The introduction of safety assessment reports for the chemical process-industries in the Netherlands	II	43
H.R. Hill, D.J. Bruce, W.M. Diggle, Cleveland, GB		
The interaction between local authority services and industry to deal with major emergencies	II	51
G.E. Rappini, B. Canepa, A. Peloso, A. Barbieri, Genova, I		
The role of the terotechnology in the industrial loss prevention	II	63
C.J. Luck, London, GB		
The key role of supervisors in safe working	II	73
J. Oberhansberg, Frankfurt, FRG		
Dismantling of chemical plants handling hazardous substances	II	77
B. Roche, J. Mansot, R. Grollier Baron, P. Perez, Lyon, F		
Safety rules concerning fire and explosion hazards in a research center equipped with pilot units	II	87
E. Bresson, P. Perez, Lyon, F		
Isolated work stations	II	97

	Session/pages
<b>Session III - Material Properties and Test Methods</b>	
<hr/>	
Th. Grewer, Frankfurt, FRG Chemical structure and exothermic decomposition	III 105
J. Viallon, Saint-Fons, F Study of flammability or decompositions of gases or vapours	III 115
K. Eigenmann, L. Hub, J. Schildknecht, Basel, CH Critical discussion of thermal methods to assess the safety of chemical processes:	III 123
K. Eigenmann A program for testing the thermal safety of chemical processes	124
L. Hub Comparison of test methods used for assessment of exothermicity	131
J. Schildknecht Development and application of a "mini pilot reaction calorimeter"	139
H. Gräfen, K. Gerischer, U. Gramberg, Leverkusen, FRG Damage prevention in chemical plants through systematic failure analysis	III 145
D.H. Napier, D.A. Rossell, London, GB Hazard aspects of static electrification in dispersion of organic liquids	III 157
D.C. Bull, Chester, GB Autoignition at hot surfaces	III 165
A. Fiumara, San Donato Milanese, I Explosion pressure as parameter for the safety in the process industries	III 173
V. Pešata, Praha, J. Strnad, Vlašim, M. Novotný, S. Sedláček, Pardubice, CS Some new methods for the determination of safety characteristics	III 183
<b>Session IV - Process Development, Design and Construction</b>	
<hr/>	
F.W. Evans, P. Meyer, W. Oppliger, Basel, CH Safety considerations in the development and design of an industrial nitration plant	IV 191
E. Schöttle, J. Hader, Berlin, FRG The development of process control for a multi-charge pharmaceutical production unit	IV 199

	Session/pages
A.W.M. Balemans, T. van de Putte, Voorburg, NL Guideline for explosion-resistant control buildings in the chemical process industry	IV 215
B.J. Wiekema, H.J. Pasman, Th.M. Groothuizen Rijswijk, NL The effect of tubes connected with pressure relief vents	IV 223
J.E. Huff, Midland, Mich., USA A general approach to the sizing of emergency pressure relief systems	IV 233
W.E. Baker, E.D. Esparza, J.J. Kulesz, San Antonio, Tex., USA Venting of chemical explosions and reactions	IV 241
M. Hattwig, Berlin, FRG Selected aspects of explosion venting	IV 249
<b>Session V - Process Development, Design and Construction</b>	
<hr/>	
R.G. Hill, Princeton, N.J., USA The sizing of vacuum breakers for distillation equipment	V 257
L. Hub, Basel, CH On-line hazards identification during chemical processes	V 265
G. Munday, London, GB On-line monitoring and analysis of the hazard of chemical plant	V 273
J.F. Straitz, J.A. O'Leary, Philadelphia, USA Flare radiation	V 281
W. Brötz, A. Schönbucher, R. Schäble, Stuttgart, FRG Statistical investigations of pool flames	V 289
<b>Session VI - Vapour Clouds</b>	
<hr/>	
K. Hasegawa, K. Sato, Tokyo, J Study on the fireball following steam explosion of n-pentane	VI 297
B. Maurer, K. Hess, H. Giesbrecht, W. Leuckel, Ludwigshafen/Rhein, FRG Modelling of vapour cloud dispersion and deflagration after bursting of tanks filled with liquefied gas	VI 305
V.J. Clancey, London, GB The development of hazardous clouds	VI 323

	Session/pages
H.J. Kolodner, Charlotte, N.C., USA A practical approach to vapour cloud protection	VI 333
W.E. Baker, P.S. Westine, P.A. Cox, San Antonio, Tex., USA Methods for prediction of damage to structures from accidental explosions	VI 339
P.H.M. te Riele, Amsterdam, NL The atmospheric dispersion of heavy gases emitted at or near ground level	VI 347
R.A. Cox, D.R. Roe, London, GB A model of the dispersion of dense vapour clouds	VI 359
 <u>Session VII - Hazard Analysis</u>	
G.A. Martin-Solis, P.K. Andow, F.P. Lees, Loughborough, GB An approach to fault tree synthesis for process plants	VII 367
S.A. Lapp, G. Powers, Pittsburgh, USA Computer-assisted generation and analysis of fault trees	VII 377
J.H. Bowen, Warrington, GB The application of an event data store to safe operation	VII 385
S. Lundquist, Uppsala, H. Laufke Stockholm, S A method for quantification of fire risk in industry	VII 399
R. Lautkaski, T. Mankamo, Helsinki, SF A risk assessment of the rail transportation of liquid chlorine	VII 407
U. Mosig, Köln, FRG Safety by means of instrumentation and control equipment with examples from petrochemical plants	VII 415
M. Vaillant, Paris, F Fault trees based on past accidents. Factorial analysis of events	VII 425
 <u>Session VIII - Hazard Analysis</u>	
A. Shindo, T. Umeda, Yokohama, J A systems approach to the safety design of chemical processing systems	VIII 433

	Session/pages
W.R. Johns, London, GB J. Sadowski, Zürich, CH Optimal maintenance and operation policy for plant with semi-predictable failure characteristics	VIII 441
Ø. Berg, Stavanger, N The terotechnological implications of capital plant breakdown	VIII 447
 <u>Session IX - Safety and Fire Protection</u>	
A. Barbieri, G. Fumarola, R. Pastorino, A. Peloso, G. Ferraiolo, Genova, I Review paper of industrial loss and prevention history in Italy	IX 461
T. Wakabayashi, Tokyo, J Major accidents in petrochemical industries and safety regulations in Japan	IX 473
M. Reuillon, H. Mellottée, R. Delbourgo, Orléans, J.C. Malet, Y. Fruchard, Cadarache, F New developments on the extinction of metal fires in general and of sodium fires in particular	IX 481
H. Warncke, Leverkusen, FRG Monitoring systems for toxic gases	IX 487
A.H. Searson, New Malden, GB Control of major fire emergencies in refineries and petrochemical plants: Action checklist for emergency supervisors	IX 495
J. McQuaid, Sheffield, GB The design of water-spray barriers for chemical plants	IX 511

# LOSS PREVENTION AND SAFETY PROMOTION IN THE PROCESS INDUSTRIES

## DISCUSSIONS

2nd International Symposium  
Heidelberg, 6-9 September 1977

European Federation of Chemical Engineering (EFChE)  
(189th Event)

---

LOSS PREVENTION AND SAFETY PROMOTION  
IN THE PROCESS INDUSTRIES

2nd International Symposium  
Heidelberg, Fed. Rep. Germany, 6 - 9 September 1977

PART II

Introductory Paper  
Discussions and Errata of Papers in Part I  
Informal Discussion Meeting on Risk Analysis  
Authors' Index

Responsible for the contents: The Authors  
(Their manuscripts have been copied without corrections)

The PROCEEDINGS

of the 2nd International Symposium on Loss Prevention and  
Safety Promotion in the Process Industries, Heidelberg 1978,  
are formed by Parts I and II together  
(Part I - Papers presented at the Symposium -  
was distributed as 'Preprints')

Deutsche Gesellschaft für chemisches Apparatewesen  
Frankfurt (Main) 1978

Part IIPrefaceIntroductory paper

K.A. Wetjen, Ludwigshafen, FRG

Loss prevention and safety promotion - An important component of management's multiple functions

I - 523

Discussions and Errata of Papers in Part I

Session I

I - 533

Session II

II - 534

Session III

III - 538

Session IV

IV - 548

Session V

V - 553

Session VI

VI - 559

Session VII

VII - 568

Session VIII

VIII - 576

Session IX

IX - 590

Informal Discussion Meeting on Risk AnalysisReport on discussions

599

Papers

H.I. Joschek, J. Dehler, G. Helmstädter, FRG

An attempt at systematizing terminology in the field of loss prevention in the chemical industry

601

T. van de Putte, Voorburg, NL

(Proposed) definitions of some terms used in safety studies

609

C. van den Berg, Enschede, NL

A compilation of some published definitions in the field of risk analysis

615

F.P. Lees, Loughborough, GB

Some aspects of failure and other data for use in reliability studies

617
